

Sarah Chen

sarah.chen@outlook.com | (555) 987-6543 | San Francisco, CA

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience specializing in cloud architecture and backend development. Strong expertise in Python, AWS, and distributed systems.

EXPERIENCE

Senior Software Engineer | CloudTech Solutions | Mar 2021 - Present

- Architected microservices infrastructure on AWS serving 2M+ daily users
- Led team of 5 engineers in redesigning the core API platform
- Implemented auto-scaling with Kubernetes and Docker
- Built data pipelines using Python, Apache Spark, and Kafka
- Established CI/CD workflows with Jenkins and Terraform

Software Engineer | DataFlow Inc. | Jul 2019 - Feb 2021

- Developed Python backend services using Django and FastAPI
- Built RESTful and GraphQL APIs for mobile and web clients
- Integrated AWS services (S3, Lambda, DynamoDB) for scalable solutions
- Implemented automated testing achieving 90% code coverage

EDUCATION

M.S. Computer Science | Stanford University | 2019

B.S. Software Engineering | UC Berkeley | 2017

SKILLS

Languages: Python, Java, Go, JavaScript, TypeScript, SQL, Bash

Backend: Django, FastAPI, Flask, Spring, Node.js, Express

Cloud/DevOps: AWS, GCP, Docker, Kubernetes, Terraform, Jenkins, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Elasticsearch

Other: Microservices, REST, GraphQL, Git, Linux, Agile, Scrum, Leadership
